
Proposed Strategic Action Plan

Fairfield Off-Road Racing (FORR)

Presentation Digest

01

BUSINESS OVERVIEW

Why is Fairfield Off-Road Racing the ideal partner?

02

VEHICLE CAPABILITIES

How does the UTV address the problem?

03

MANUFACTURING & DISTRIBUTION

How fast and efficient is production?

04

MARKETING CAMPAIGN

How do we start a movement?

05

PROJECT TIMELINE

When does this all happen?

06

FINANCIAL OUTLINE

Are we going to be able to maintain and afford this plan?

01 BUSINESS OVERVIEW

Why is FORR the ideal partner?

OUR COMPANY

02 VEHICLE CAPABILITIES

How does the UTV address the problem?

The Baja Buggy

Chassis

- Lightweight Framing
- Durable Roll Cage
- Ergonomic Design

Drivetrain

- Adjustable Transmission
- Low Speed Torque
- Togglable 4WD

Suspension

- Adjustable Suspension
- Ackerman Steering
- Rigid Linkages

Brakes

- Lock up ability
- Adjustable Pressure
- Short Stopping Distance

Chassis

Chassis Members			
Total Weight	81 lbs		
Fracture Load	>33 kN		
Driver Fitment			
Minimum	4' 11''	Maximum	6' 3''
Safety			
Average Egress Time		2.15s	

Drivetrain

Reduction Ratio			
High	5.79:1	Low	30.1:1
Applied Torque (ft*lbs)			
High	107	Low	556
Wheel Speed (MPH)			
High	40.7	Low	7.8

Suspension

Key Features

- Adjustable length arms (+/- ½") for: toe, camber
- Adjustable caster
- Reverse threaded components on rear control arm for adjustment without disassembly
- Self-lubricating Heim joints for superior dirt resistance

Brakes

Calculated Values	Symbol	Units	Value
Front Normal Force	F _{nf}	lbf	127.28
Rear Normal Force	F _{nr}	lbf	247.13
Front Caliper Force	F _{fc}	lbf	340.67
Front Circuit Line Pressure	P _f	lbf/in ²	101.76
Master Cylinder Force (Front)	F _{mcf}	lbf	79.92
Master Cylinder Force (Rear)	F _{mcr}	lbf	545.02
Shaft Center to Rear Caliper Piston	R _{rcp}	in	3.31
Rear Caliper Force	F _{rc}	lbf	599.52
Rear Caliper Line Pressure	P _r	lbf/in ²	693.94
Total Braking Force Needed	F _b	lbf	350.40
Front Braking Force Needed	F _{bf}	lbf	92.91
Rear Braking Force Needed	F _{br}	lbf	180.40
			273.31

25 ft stopping distance from full speed on dirt

03 MANUFACTURING & DISTRIBUTION

How fast and efficient is production?

Supply Chain Security

Geographical Advantage

Distribution Strategy

04

MARKETING CAMPAIGN

How to we start a movement?

Key Objectives

Education

Spread awareness on environmental issues

Branding

Establish a brand that can ignite passion and loyalty

Sales

Generate revenue for offsetting cost

Positioning

Increase market share and allow for expansion

Driving Sustainably Through Impactful Conservation

Branding & Education

Sales Outline and Positioning

Market Channels

05

PROJECT TIMELINE

When does this plan come to fruition?

Timeline

Phase #1

***Initial
Startup and
Prototyping***

Phase #2

***On-Site
Testing and
Training***

Phase #3

***Meeting
Initial
Demand***

Phase #4

***Meeting
Yearly Quota
Sustainably***

<i>Phase #1</i> <i>Initial Startup and Prototyping (Months 1-6)</i>	
Month 1-2: Project Kickoff and Planning	•Establish a foundation •Talent Acquisition •Create communication channels
Month 3-4: Design and Prototyping	•Fulfill ISA requirements •Constant feedback •Begin prototype development
Month 5-6: Prototype Refinement and Approval	•Testing of prototypes •Design changes based on outcomes •ISA's approval for the finalized prototype

Phase #2
On-Site Testing and Training (Months 7-12)

Month 7-8: Initial Production	•Initial production of prototypes •Initiate on-site testing of vehicle
Month 9-10: On-Site Testing and Performance Evaluation	•On- site testing in critical locations (forests, deserts, mountain ranges) •Collect data and identify improvements •Training programs for ISA personnel in vehicle operation and maintenance
Month 11-12: Iterative Refinement and Final Training	•Feedback from on-site testing into vehicle design •Conduct final training sessions for ISA personnel •Ensure vehicles meet or exceed performance expectations

Phase 3
Meeting Initial Demand (Months 13-24)

Month 13-15:
Initial Product
Rollout

- Launch the first batch of vehicles to meet ISA's initial 500-unit quota
- Monitor initial customer feedback and address any issues promptly

Month 16-18:
Scaling
Production

- Optimize production processes for scalability
- Increase production volume to meet growing demand
- Maintain open communication with ISA to address any emerging challenges

Month 19-24:
Continuous
Improvement and
Customer
Support

- Implement continuous improvement based on customer feedback
- Provide ongoing technical support and training to ISA and end-users
- Monitor and adjust production to meet fluctuations in demand

Phase 4
Meeting Yearly Quota Sustainably (Months 25-48)

Month 25-30:
Scaling Production
Capacity

- Assess and enhance production capabilities to meet increased yearly quotas
- Streamline supply chain processes for efficiency
- Strengthen relationships with key suppliers to secure materials

Month 31-36:
International
Expansion
Consideration

- Evaluate opportunities for international expansion based on global demand
- Explore partnerships for manufacturing in strategic regions
- Establish logistics for international distribution

Month 37-48:
Sustainable
Growth and
Innovation

- Continuously meet and exceed yearly quotas
- Invest in research and development for technological advancements
- Stay adaptable to market trends and emerging technologies

06

FINANCIAL OUTLINE

Are we going to be able to afford and maintain the plan?

Cost Breakdown

53%

Components

\$8,000

7%

Manufacturing

\$1,000

17%

Labor

\$2,500

5%

Maintenance

\$750

10%

Shipment

\$1,500

8%

Marketing

\$1,250

\$15,000

Industry Analysis

680,000

Units Sold in 2023

Market Share

27%

24%

23%

High Demand

ATV & UTV industry currently valued at \$4.56 Billion

Expected Growth

Expected to reach \$5.75 Billion By 2030 with 2.7% CAGR

High Startup Costs

Higher barriers to entry means less market competition

Pricing Strategy

Price Per Unit and Distribution						
	Single Unit		5+ Units		10+ Units	
<i>Government</i>	\$23,000	>5%	\$21,000	25%	\$19,000	30%
<i>NGO'S</i>	\$24,000	>5%	\$22,000	15%	\$20,000	10%
<i>Individuals</i>	\$25,000	13%	\$23,500	>1%	\$22,000	>1%

~183,600 expected units sold at current market share

ROI Projections

At Current Market
Share and CAGR

2025

\$918 million

2030

\$1.05 billion

Closing Remarks

The Perfect Partnership
